

SAFETY INSTRUCTIONS FOR ALL ROOF WALKWAY INSTALLATIONS

ASSEMBLY OF WALKWAYS TO ROOFS

INSTRUCTIONS:

1. Ensure all walkways at all times are securely fastened to the mounting rail supporting the walkway (A)
2. Mounting rails to be used parallel and perpendicular to roof sheeting as per illustration below (A)

INSTALLING OF WALKWAYS ON ROOFS WITH GRADIENTS

INSTRUCTIONS:

1. All walkways to be installed with a minimum of 2x bolts, flat & spring washers clamping through a drilled hole in the walkway and fastened into a profile nut (C)
2. Remaining walkway length can be fastened by clamping over the walkway as per image (B)
3. All walkways installed on a roof with a gradient of 5 degrees or more, are to use the mounting method shown in image (C) for all mounting rails supporting the walkway
